datalytix

Modernizing Utility Operations with Datalytix

Empowering utilities to operate smarter, safer, and more efficiently through AI and data-driven insights.

Our Solution

At Datalytix, we partner with utilities to help you recover faster, operate smarter, and stay resilient. Our AI-powered computer vision and geospatial analytics transform complex imagery and data into clear, actionable insights, enhancing operational awareness, enabling proactive decision-making, and strengthening risk mitigation across your network.

Results That Matter

✓ Faster Service Restoration

✓ Optimized Resource Allocation

✓ Streamlined Compliance and Reporting

✓ Smarter, Safer Field Operations

We don't believe in one-size-fits-all. Every community, every utility, and every challenge is unique, so our solutions are built with you, not for you.

Core Capabilities

Predictive Analytics
Forecast vegetation growth rates and storm impacts to anticipate outages before they occur.

System Integration
Connect field data, imagery, and analytics into unified workflows for faster, more informed decisions.

Asset Inventory & Mapping
Locate and verify every pole, line, and asset from one visual platform to save time and keep records accurate.

Infrastructure Health Monitoring
Identify early signs of equipment wear or line issues to prevent outages and keep systems reliable and safe.

Vegetation & Encroachment Management
Detect and prevent vegetation risks near power lines with AI-driven insights that reduce outages and minimize the need for in-person inspections.

Damage Assessment & Emergency Response
Assess storm or accident damage through imagery to prioritize repairs and restore power faster.

Progress Tracking & Reporting Dashboards
Track restoration progress in real time and share updates across teams and stakeholders.
